How To Install Notepad Wine Mac

Access to a command-line/terminal window
Access to root or a user account with sudo privileges
The yum package manager, included by default
To compile and build new packages, you need to install fundamental development tools grouped by the name 'Development Tools'.
1 Wine uses different applications depending on whether you have a 32-bit or 64-bit OS.
If you have both CPU modes, use the instructions for the 64-bit system
On 32-bit systems, run the following commands:
On 64-bit systems, install Wine with:
The best way to check if you have successfully installed Wine is by verifying the version.
You can download this open-source software using the source code or from the EPEL repository.
GarageBand is a fully equipped music creation studio right inside your Mac — with a complete sound library that includes instruments, presets for guitar and voice, and an incredible selection of session drummers and percussionists.
Now navigate to the /tmp directory:
3 Download the source file for Wine 4.0 with the following command:
Then, extract the source file using the tar command:
Once you extract the file, you can move on to installing.
If you are not sure which one is running on your system, use the following command to find out:
2.
